+ Make It Recycled

As the saying goes 'Unless you are buying recycled products, you aren't really recycling.' Using recycled office paper is one of the simplest actions you can take for the planet, which is why Planet Ark encourages the purchase of paper with 50%, 80% and 100% recycled content.

LOOK FOR

+ Make It Australian

Australian made paper is produced to a high environmental standard. The \$90m Australian Paper recycling plant allows businesses to close the loop on their paper recycling and ensure that it is kept out of Australian landfill as well as supporting local sustainable manufacturing.

LOOK FOR

+ Make It Certified

Individual paper fibres can only be recycled around 7 times before they break down, which means new fibres need to be added to the overall mix. Looking for the logos and choosing certified paper ensures that it comes from responsible sources.
